T* UV filter and T* POL filter (circular)

Quality from Carl Zeiss.

We make it visible.

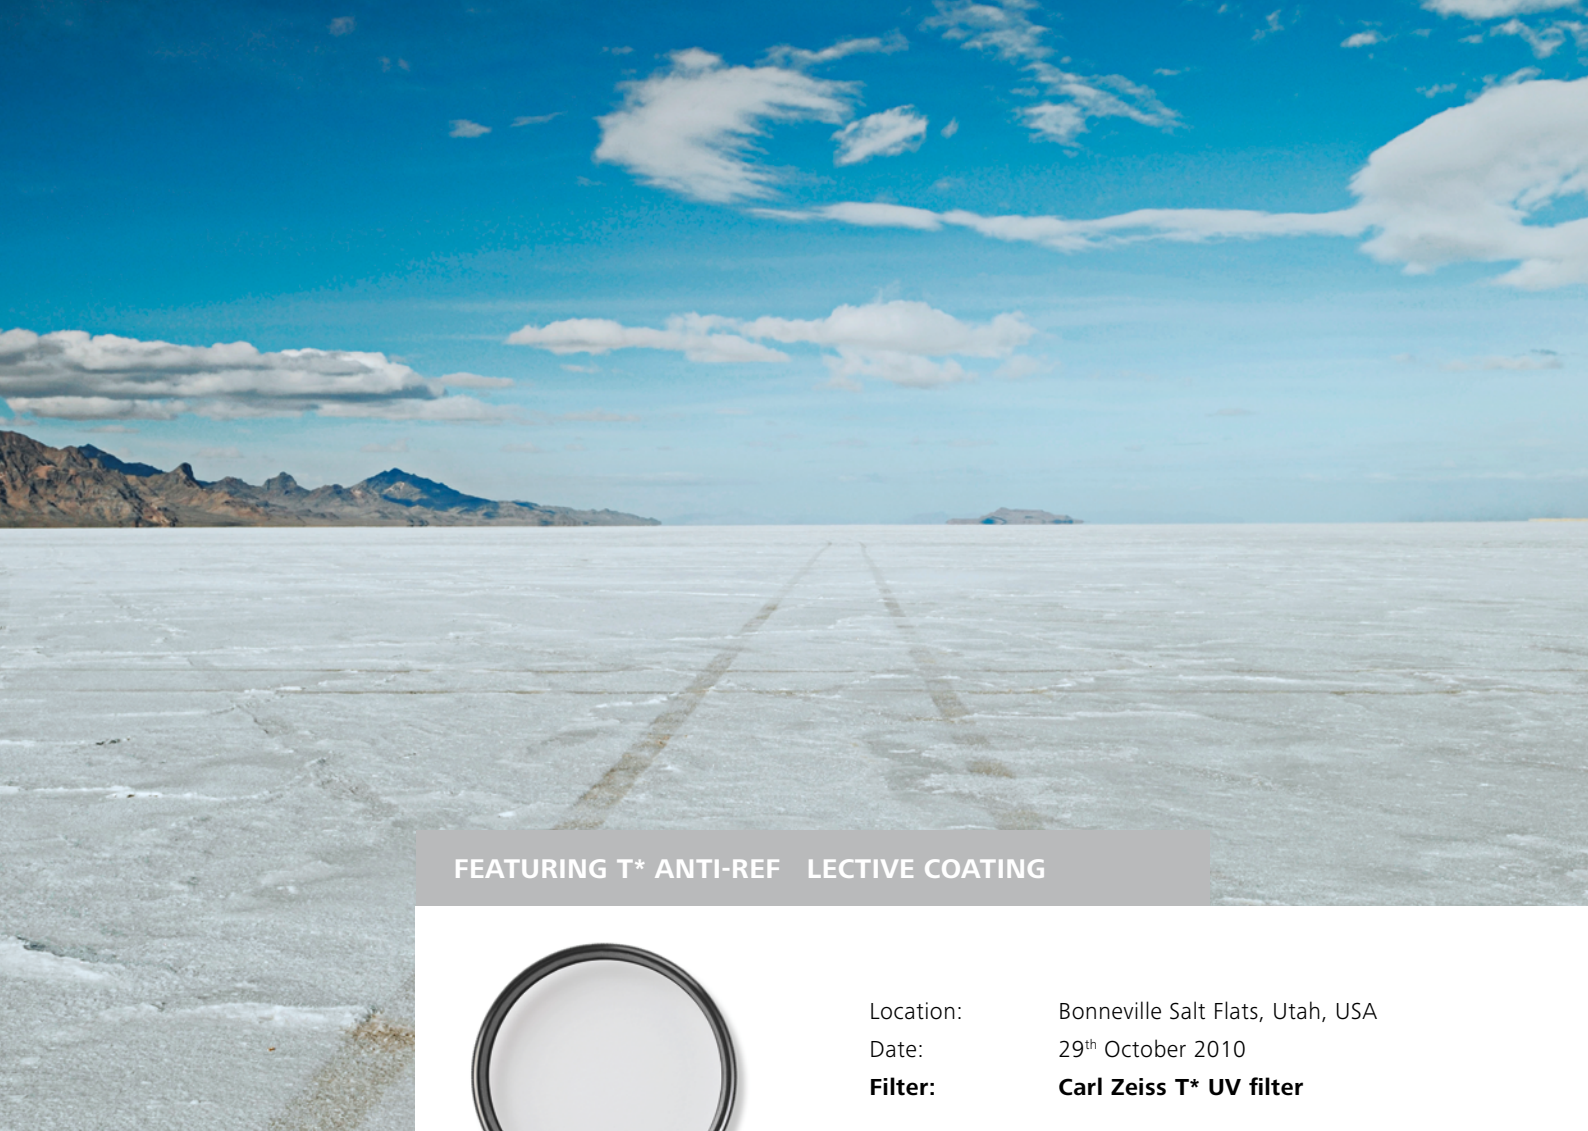

T* UV and POL filters from Carl Zeiss.
Quality down to the last detail.

The name ZEISS has been synonymous with quality down to the last detail ever since Carl Zeiss opened his optical workshop in 1846.

Your photos now also benefit from this quality. Demanding photographers know that a perfect photo requires perfect conditions: the subject, of course, but primarily the camera equipment. For this reason, Carl Zeiss offers lenses that more than meet these demands. The offer is rounded off with the right UV and POL filters featuring the T* anti-reflective coating – for exceptional quality.

**Ensuring that your photo is incomparable.
Each time.**

FEATURING T* ANTI-REFLECTIVE COATING

Location: Bonneville Salt Flats, Utah, USA

Date: 29th October 2010

Filter: **Carl Zeiss T* UV filter**

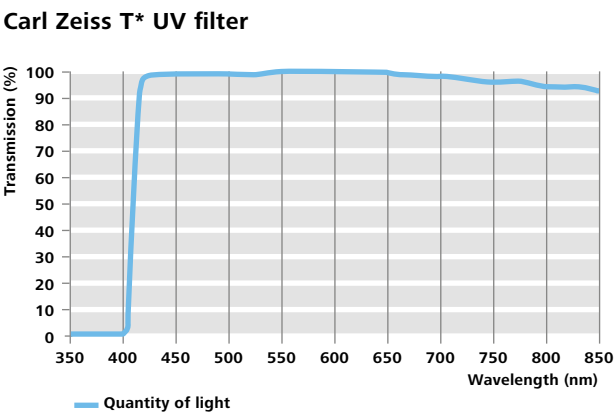

Crystal clear: the UV filters featuring the T* anti-reflective coating from Carl Zeiss provide optimal protection for the front element of your lens. They also ensure absolute brilliance without altering the color rendition or exposure time.

For colors as rich as in nature.

Technical data
Carl Zeiss T* UV filter

- Quality** High-quality glass featuring Carl Zeiss T* anti-reflective coating
- Flexibility** High-fit accuracy for fast filter change.
Can be used with a lens shade
- Compatibility** Ideal for ZEISS lenses. Can be used with non-ZEISS lenses
- Effect** Optimal protection of the front lens element and more clarity for your photograph

FEATURING T* ANTI-REFLECTIVE COATING

Location: Pulau Nias, Sumatra, Indonesia

Date: 20th November 2010

Filter: **Carl Zeiss T* POL filter (circular)**

Discover something new: the POL filters featuring the T* anti-reflective coating from Carl Zeiss provide you with entirely new photographic insights by avoiding reflections on non-metallic surfaces. Experience a new definition of color and contrast.

For photos that become revelations.

Technical data

Carl Zeiss T* POL filter

Diameter

Precision

Rotary mount to set the filter effect (light reduction: 1.5–2 EV)

Quality

High-quality glass featuring Carl Zeiss T* anti-reflective coating

Flexibility

High-fit accuracy for fast filter change.
Can be used with a lens shade

Compatibility

Ideal for ZEISS lenses. Can be used with non-ZEISS lenses

Effect

Minimizes light reflections on non-metallic surfaces and increases the color saturation of long-distance shots
